Profile

Fullstack Software Developer specializing in React and Next.js/TypeScript on the frontend, with solid backend experience across Django and NestJS. Skilled in building responsive UI, managing application state, and designing RESTful APIs that connect cleanly across the stack. Background includes production work on a robotic cooking automation platform, contributions to an AI research initiative at the University of Aveiro, and an analytical foundation from a Master's in Physics Engineering, with additional experience in Python data analysis (Pandas/NumPy) and Unity game development.

PROFESSIONAL EXPERIENCE

02/2026 – Present Aveiro, PT	WishandCook Software Developer - Contribute full-stack (NestJS/Next.js) to a production robotic cooking automation platform, including a frontend design-system migration and end-to-end debugging of a real-time notification pipeline. - Designed UI/UX for a tablet-based field maintenance application, including a dark-mode design system and high-fidelity dashboard mockups.
11/2024 – 01/2026 VN Gaia, PT	Kendir Studios Unity Game Developer - Developed educational 2D and 3D games in C# using Unity, in partnership with Portugal's General Board of Education (DGE). - Collaborated within a cross-functional team of developers, designers, and project managers to deliver projects on schedule.
03/2021 – 08/2024 Aveiro, PT	Wishand Cook Fullstack Developer & Data analyst - Designed and maintained responsive web interfaces in React and Next.js, implementing dynamic UI components, application state management, and API integration. - Built backend systems and RESTful APIs using Django and Django REST Framework, including server-side logic and database integration. - Developed data analysis pipelines and mathematical algorithms in Python (Pandas, NumPy).

EDUCATION

09/2012 – 12/2018 Porto, PT	Integrated Master's degree in Physics Engineering (Final average: 15) Faculdade de Ciências, Universidade do Porto Built a strong foundation in mathematics, analytical problem-solving, and Python-based data analysis and simulation.
--------------------------------	---

SKILLS

• Frontend: React, Next.js, TypeScript, JavaScript	• Backend: Django, NestJS	• Other: Python (Pandas, NumPy), Unity, C#
